

# SANSIDOR

FOR A SAFE AND HEALTHY ENVIRONMENT

Young yet very experienced: Sansidor is the new TIC company (Testing, Inspection and Certification), doing things slightly different than others. It goes without saying that our advice, inspections, audits and analyzes are also reliable, independent and on time. What sets us apart? We are "big" and "small" at the same time. Within our network organization, we clearly take the ball early. We do this with confidence, knowing we have the accuracy of a large network behind us. Sansidor builds safe and healthy environments in the Netherlands and abroad. Our services are getting more interesting by the day. How? We keep adding strong brands to our network through our successful Buy & Build. Together.-strategy.

Sansidor is a powerful and dynamic network of professionals in the fields of water, air, infection prevention, asbestos, building inspections and food safety. Our brands? Stella Lab, PLM, HCN, Immolab, Aquative, Tensen & Nolte, Dia-go and Purus. Together we stand for a safe and healthy environment.

## BUY & BUILD. TOGETHER.

Our successful Buy & Build. Together.-strategy allows companies to join Sansidor. If it's up to us, we will become the most dynamic, fastest growing and most customer-oriented TIC network in the Netherlands (and beyond). That's why we are looking for entrepreneurs who want to sell their company and want to continue doing business together under the Sansidor brand. The most ideal candidates are family businesses, inspection companies, specialized laboratories and consultancy organizations from 10 to 75 FTE with a proven track record. Sansidor will eventually provide assistance with all support services, arranging these from the network. Entrepreneurs can focus on doing their specialized business. At the same time, they can get inspiration from new sister companies and fellow directors. And not to forget: the HC Partners investment comes with financial security.

Delivering quality is our top priority. Inspiring each other follows closely. Taking good care of our people is a precondition on which we never compromise. And it's exactly what we do it for: helping our customers and providing them with correct advice, inspections and analyzes. Curious & interested? Be sure to get in touch with us:
